

GM Mining Electrics

Environmental Policy

As an industry leader in our field *GM Mining Electrics* is committed to being a leader in environmental practices. As such our aim is to ensure that our approach to work pertaining to environmental issues is of the highest standard that is practicable and/or possible and that our impact on the environment is kept to a minimum. We recognise the value and necessity to maintain a clean and healthy environment for the present and the future; therefore we have implemented a proactive and responsible approach to environmental sustainability through the following activities:

- Ensure all aspects of our business activities are carried out in accordance with all relevant environmental legislation.
- Identify and where possible, implement initiatives that reflect current industry best practices.
- Reduce waste to landfill by recovery and recycling activities, minimise pollution and work to reducing energy consumption.
- Eliminate potential environmental risks through safe liquid storage and containment.
- Use environmentally preferred products wherever possible and/or practical.
- Regularly monitor and review our environmental management practices with a view to continually improving our approach.
- Ensure all staff, labour hire staff and contractors are aware of this policy and communicate effectively and regularly on this matter and any changes.
- Encourage staff to contribute in working to improving our practices.
